OUR BREEDER IS FINICKY. OUR ROSES ARE NOT.

During our breeding process, we never spray for black spot and mildew, allowing only the strongest to survive. Because they're so tough, they're so easy to enjoy in your garden. With Easy Elegance® you can have beautiful roses that are not only hardy, but will continue to bloom all season long. Plus every rose in the collection is grown from its own root, so they have a superior shape, evenness of size and are free from suckering. Best of all, these roses truly live up to the phrase "plant and forget."

PING LIM - OUR ROSE BREEDER

Our internationally-recognized rose hybridizer, Ping Lim, was integral to the development of our Easy Elegance® Rose Collection. He oversees our entire rose program—from the 35,000 crosses made each year and 250,000 seeds that result, to the evaluation of plants in Oregon, Minnesota, Arizona and points beyond.

A journalist recently asked Sam McGredy, the world-renowned rose breeder, what the future of roses would be. Mr. McGredy answered quite simply, "Go ask Ping."
